

MassMutual Upgrades to Latest Version of FJA's Product Machine

New York City, NY – The Disability Income Insurance area of Massachusetts Mutual Life Insurance Company (MassMutual) has successfully upgraded to version 3.1 of FJA's Product Machine.

MassMutual licensed the Product Machine in 2001 to support product modeling of their disability products. In addition to improving MassMutual's modeling capabilities, this implementation has shortened the time and cost of bringing products to market.

"Our new version of PDFS allows us to develop centralized calculations and rules as well as intuitive product components, reducing the time and complexity to implement new products," said Dave Trono & Rick Martinez, systems consultants for MassMutual.

FJA is a leading software and consulting firm for the financial services sector, with a special focus on Product development & insurance.
